To whom it may concern,

Ozone Washing in the Aged Care Sector

John Paul Village is a 163 bed aged care facility in Heathcote, Southern Sydney. The village includes a mix of low-care, high-care and self-contained units and has an on-site laundry facility.

After extensive trials of alternate ozone systems on site, we installed an EnviroSaver II Ozone Laundry System in our laundry in November 2007.

Compared to the cold-water wash system which we had on trial, the EnviroSaver unit delivered a far better wash quality and eliminated problems with off-gassing of ozone.

O3 Wash co-ordinated the support of our equipment supplier Aqua Logic (IPSO washing machines) and our Chemical supplier, Cleveland Cleaning Supplies to ensure that the best possible laundry process was established with the use of ozone.

The EnviroSaver unit has been operating seamlessly since its installation and we would have no hesitation in recommending O3 Wash Pty Ltd and their product to other aged care providers, particularly under the Greening Grey Facilities program.

If you wish to discuss our experience with ozone laundry systems please feel free to contact the undersigned on 02 9520 2444.

Yours sincerely,
