To whom it may concern,

### **Our Lady of Consolation, Rooty Hill – Ozone Laundry Equipment**

In 2004, Our Lady of Consolation teamed up with the NSW Department of Environment and Conservation (DEC) to trial a new ozone laundry equipment for aged care providers. Our laundry providing a service to our 303 residential aged care clients (Commonwealth funded) at our Rooty Hill campus, as well as supports a home linen service (HACC funded) to several hundred clients. We also provide a linen service to several external aged care providers.

The direct-injection equipment was supplied, installed and commissioned by of O3 Wash Pty Ltd with Geoff Homann and Jack Reiff.

O3 Wash co-ordinated the support of our equipment supplier Advance Commercial Laundry Equipment (Girbau washing machines) and our Chemical supplier ECOLAB to ensure that the best possible laundry process was established with the use of ozone.

Since the installation, we have had a very positive experience with the ozone technology. The wash quality has improved, there is no noticeable smell of ozone gas and we have made significant savings on energy, water, chemicals, labour and linen degradation.

I would recommend the use of the O3 Wash programmable direct-injection into the wash basket ozone laundry technology to anyone considering improving their laundry operation.

Yours sincerely,

Mark Doyle,  
Corporate Services Manager,  
Our Lady of Consolation Age Care Services Ltd
